

Amsterdam, 10 October 2003

To whom it may concern:

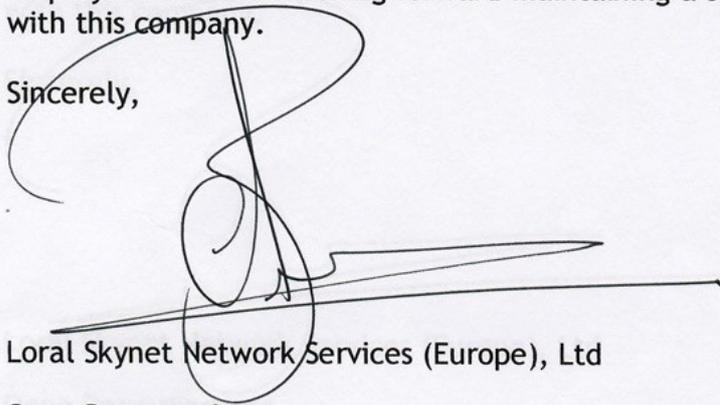

Loral Skynet Network Services Inc. a corporation organized and existing under the laws of the state of Delaware (USA), having its registered office at 500 Hills Drive, Bedminster, New Jersey, 07921, U.S.A. confirms that Diomar, a limited company having its office at ul. Na Skraju 34, PL-02-197 Warszawa, has an agreement with Loral Skynet to act as a "Ground Operator" in the territory of Poland, Sweden and Finland and in other countries where necessary. This agreement became active in May 1998.

As a partner of Loral Skynet and it's predecessors Orion Network Systems, Loral Orion and Loral CyberStar, Diomar has successfully installed and maintained complex VSAT terminals for our customers in Poland, Belarus, Sweden, Finland and Germany.

In addition Diomar's team acquired a significant appreciation during the Strong Resolve Operation organized by the NATO in February 2002. Under a very high time pressure Diomar's technicians managed to install a number of temporary satellite communications links for voice/data connection between the Command Center in Germany and three Air Force bases in Poland.

I am extremely pleased with the attitude and technical skills of Diomar's employees and I am looking forward maintaining a solid and long-term relationship with this company.

Sincerely,

Loral Skynet Network Services (Europe), Ltd
